

Fall 2011 Seminar Series

Origins @ Yale

Jonathan Fortney

University of California at Santa Cruz

“Exoplanet Structure”

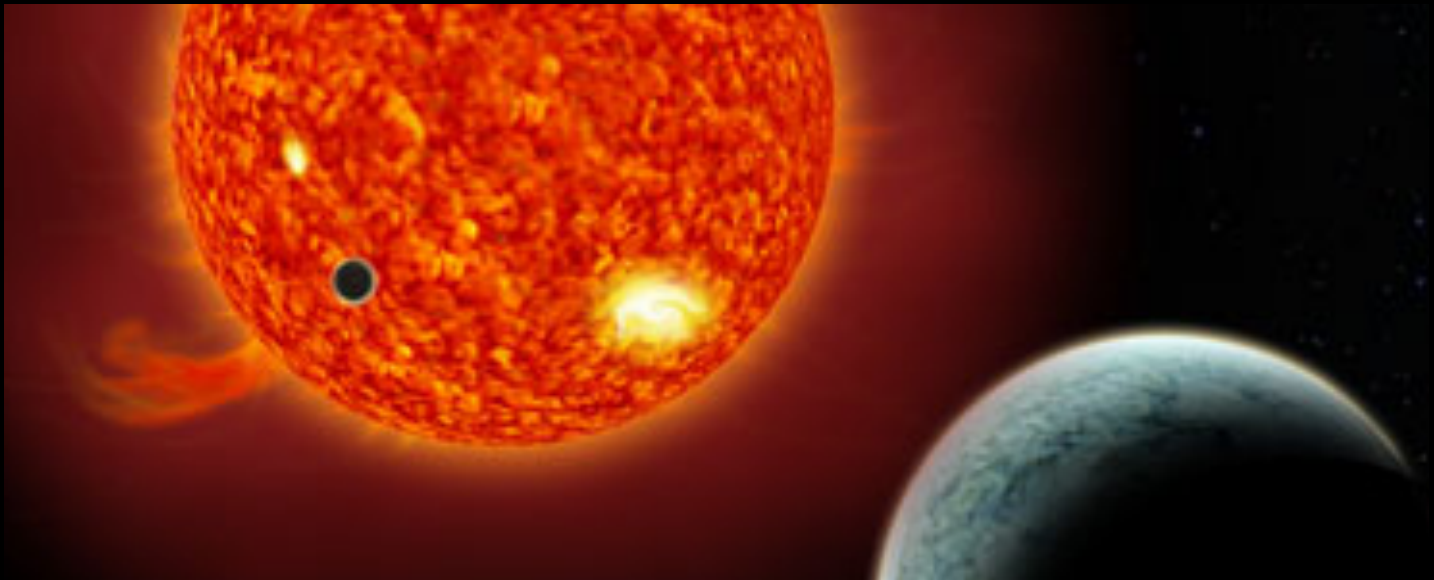

Image by Haven Giguere

Wednesday, 11/9 @ 2pm

Kline Geology Laboratory, Room 123

Jonathan Fortney, Associate Professor of Astronomy & Astrophysics at the University of California at Santa Cruz, studies the interiors and atmospheres of planets in and outside of the solar system. He works to understand planets as a class of astrophysical objects. His current research focuses on modeling planetary atmospheres, interiors, and thermal evolution.
